In Literacy this week we have sequenced events from our story and learnt more about similes and homophones. When writing we have used awesome animal adjectives!

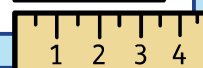

In Topic we explored some Victorian inventions - most of them we still use today! We wrote about the invention we thought was most useful.

We cannot wait to see some of these artifacts when we visit Blist Hill!

In Maths group one have been busy measuring in mm, cm and metres. We have also compared equivalent lengths.

Group 2 have been learning about percentages and decimals.

The animal man visited us on Wednesday, he had some interesting friends with him! We loved meeting all the animals and learning more about them. The children were very brave and respectful towards them.
