

Hello everyone and welcome to our first newsletter of the summer term! The sun has been shining and the children have settled back into school really well. We have already seen lots of fantastic work. Here are a few highlights of our first week.

Maths

## Maths

Our Maths focus for this week is fractions. AJ, Ryleigh and Alexia-Rae have been using fraction bars to compare and order fractions.

Meanwhile, Jake and George have been working incredibly hard in their link class-revising for their SATs.

PE

## PE

The summer sunshine means we have been able to get outside for our PE Lesson. This term, we are working hard to improve our tennis skills.

Geography

## Geography

In Geography this week, we have been investigating atlases and globes. We had a great time looking at countries all around the world.

We have started our new Science topic this week.  
We are learning all about living things in our local environment.

We started by using **Mrs Gren** to help us to identify living and non-living things.  
Do you know which life processes are represented by the letters in Mrs Gren's name?

We then went outside to find living and non-living things in our school grounds.

We have had a really good week here at the hub and I know this is going to be a great term. We look forward to sharing our adventures with you.
