

Class 12

9.5.25

Literacy

Whilst reading George's Marvellous Medicine this week, Class 12 have designed their own medicines for Grandma using their imagination to think of disgusting ingredients! We have also used

conjunctions (because, and, but) to write or finish sentences about events in the story.

P.S.H.E.

In P.S.H.E. this term we are looking at Relationships. Last week the children thought about their self-esteem and gave themselves compliments before giving them to their friends. This week we have been thinking about online relationships and e-safety. We discussed age requirements for apps and games and why they are important and rules

for staying safe online.

Topic

Topic

In Topic this week we have continued looking at electricity as part of Bright Sparks. We started the week by learning about electrical safety, including how to use electrical appliances safely and how to

stay safe around electrical equipment such as pylons and electrical boxes. The children looked at cartoons and identified potential dangers in the images.

The children have also been showing off their knowledge of circuits! After learning about how electricity travels around a circuit and that all circuits must have at least three components - an energy source such as a battery, wires and an electrical load such as a bulb, all the children had a go at building their own circuits including various components.

Have a good weekend!
