

Topic

This week the children have continued our How Humans Work topic. The children have been learning about hearing and the ear this week. The children have used the VR headsets to visualise sound waves and how they reach our ears. The children then created their own telephones and drums to research how sound waves travel through vibrations. The children enjoyed using the musical instruments to create sound waves and experimenting with their phones. Next week the children will be learning about teeth.

Numeracy

This week the children have continued their focus on Place Value. The children have enjoyed using practical resources and online games to represent numbers and to count different amounts.

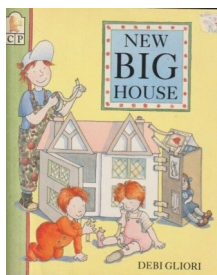

Literacy

This week in Literacy the children have been learning to write descriptive sentences. We used different types of food to create adjectives and the put these into sentences. The children have also started to learn about shape poetry. The children have read a variety of different shape poems and identified their favourites. Next week we will work towards writing our own shape poems.

Story Time

This week the children have been listening to variety of shorter stories. One of those being, 'New Big House'.

P.E is on Mondays and Fridays.

Home work is Reading, Spellings and Literacy

Have a Great Half Term
