

🍁 Class 9's Weekly Whirlwind! 🍁

We've had a super exciting week in Class 9 and guess what? We've welcomed a brand-new friend to our classroom! After lots of giggles and great ideas, the children used an online wheel spinner to choose the perfect name and the winner was 🐻 Dexter! Dexter, our class bear, is already getting involved in all our activities and making lots of new friends. We think he's going to love it here!

+ = Numeracy Magic

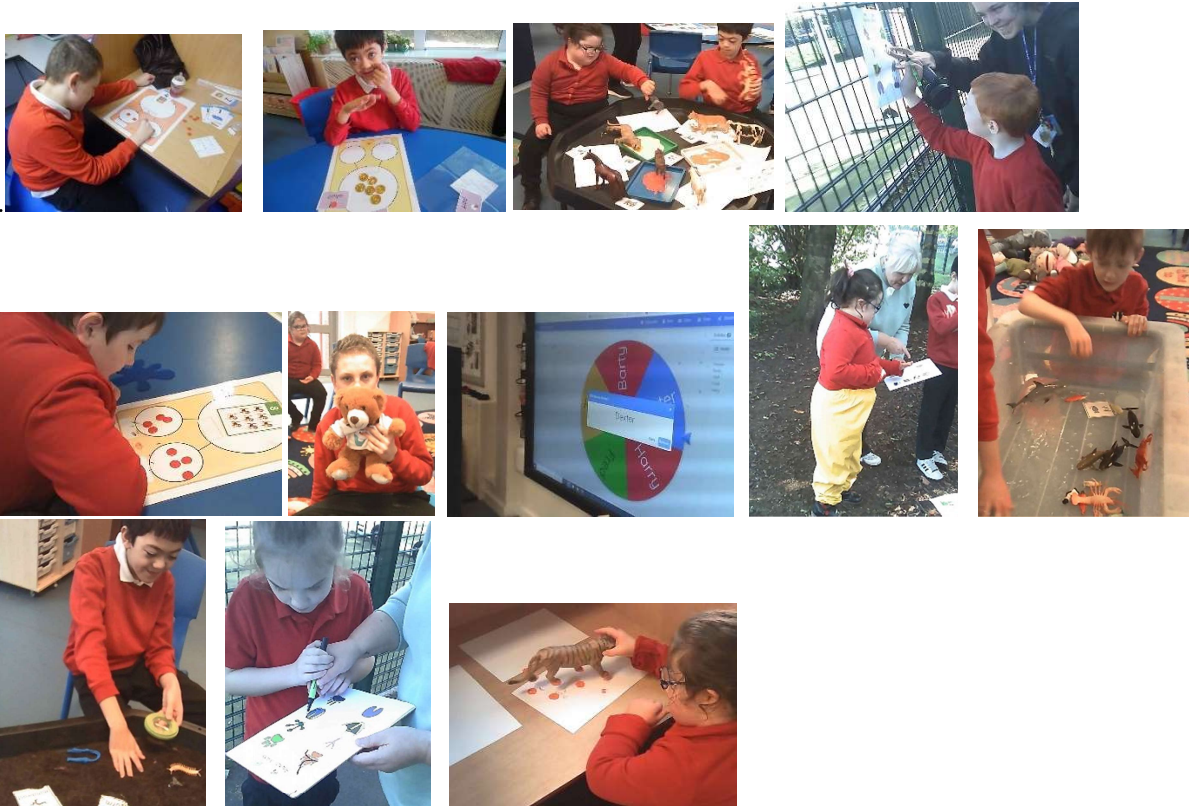

This week, we've been diving into the world of addition and subtraction. Using the part-whole model, the children learned how numbers can be broken down into parts to form a whole. It's like number-building with Lego bricks so much fun and lots of learning!

🦘 🐍 Topic Time: Animal Movers!

From hopping kangaroos to slithering snakes, Class 9 explored all the wild and wonderful ways animals move. We had great fun acting out each movement our classroom turned into a mini jungle!

🌿 Outdoor Explorers

Out in nature, we became animal detectives! Armed with our animal track charts, the children searched high and low to spot footprints and guess which creature made them.

Have a lovely weekend,

Mrs Clarke and the Class 9 team. 😊
