

*It has been another busy week in Class 9.*

*We've started our new story, Shark in the Park by Nick Sharratt, and what a splash it made! Timothy Pope's toy telescope inspired us to make our very own. With a little snipping, sticking, and following photo instructions, the children created telescopes to scan the classroom skies. Did anyone spot a shark?*

*Place value has continued to be our focus this week, and we've been exploring 'parts' in all sorts of practical and playful ways. From building with blocks to sorting and grouping, the children have been hands-on and full of number confidence!*

*What do animals eat? That's what we've been investigating! Through interactive quizzes and food-matching fun, we discovered which animals munch on hay, nibble carrots, crunch grains, and gobble berries.*

*Autumn leaves and imagination helped the children create beautiful leaf mandalas! We gathered leaves of all shapes and colours to create stunning natural art. They're now proudly displayed in our classroom.*

*Have a lovely weekend,*

*Mrs Clarke and the Class 9 team. 😊*
