### Literacy

This week the children continued reading "The Wind in the Willows". In the story, Mole and Rat visit Toad Hall. Children designed a new house for Toad to live in and then used different materials to build their houses.

### Numeracy

This week we have been learning about Measure through a range of activities. Children have been learning to:

- Use the terms 'longer', 'shorter', and 'taller'
- Measure objects using cubes
- Use a ruler to measure objects in centimetres

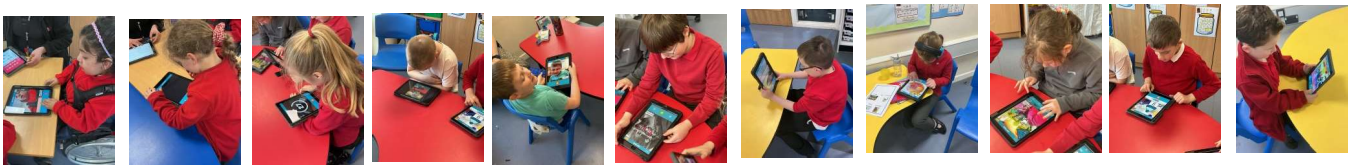

### Topic

In our Topic, 'From A to B', the children were given a mission: to make a new form of transport for Mole to go and visit his friends! Mole wanted his new transport to be fun and unusual, so we looked at some wacky forms of transport from other stories and films for some inspiration. Children then designed their transport and identified the different parts it would have, and how it would travel. Then they made their creations using junk modelling.

### Computing

Children have been enjoying learning about animation in Computing. They have been using apps such as ChatterPix and Stop Motion to create their own animations.

### Storytime

This week we have been reading 'Achoo!' by Simon Phillip.
