

## Newsletter 10th October 2025 Class 3

More of the children have really started to play together this week and have been enjoying each others company as well as enjoying shared experiences like Logan and Jenson with the 'Wiggly worm' toys.

Balloon painting was a fun activity from this week and all of the children enjoyed creating a class piece of art and choosing different colours and where to print it on the paper. Some children thought it was funny to put paint on their balloon and then flick it for the paint to go everywhere, while others thought bursting the balloons was the best fun.

The children have been enjoying the 'bucket' activity and this week we had a 'whoopee cushion', the children have thought this was the funniest thing and have been shouting to me to let them have a turn. For some of our class who find it tricky to sit in the group, this item has drawn them in and they have loved having a turn at activating it. The other item in the bucket that has made the children chuckle has been the big balloon that we have blown up then let go and it has flown around the room and deflated.

The children also enjoyed painting hedgehogs with onions and exploring the colourful 'gloop' made of cornflour and hair conditioner.

Have a great weekend from class 3
