

Topic

This week the children have continued our How Humans Work topic and have been learning about the skeleton. The children learnt about the function of the skeleton and learned to identify some of the major bones by building their own skeleton. Next week we will be learning about the Digestive system.

RAF Cosford

This week the children in year 6 had the opportunity to attend Science, Technology, Engineering and Mathematics workshops at RAF Cosford. The children all enjoyed learning about rocket flight and very much enjoyed building and launching their own rocket. The children also loved looking around the rest of the museum and exploring the inside of a plane cockpit.

Literacy

This week in Literacy the children started to focus the Greek myth Theseus and the Minotaur. The children have predicted what the Minotaur looks like and then answered questions explaining their understanding of what have happened in the story so far. This focus will continue next week with the children concentrating on writing persuasive letters.

P.E is on Mondays and Fridays.

Home work is Reading, Spellings or CVC words and Literacy

Have a weekend
