

# Newsletter 24th April 2026 Class 3

*This week in Literacy the children have been reading a book called 'The Tractor' and it has linked with our topic work too, so we have been thinking about what we need to do to the soil to get it ready for planting seeds. We have also been thinking about what a seed needs so that it can grow and we have completed several sequencing activities to support this.*

*During our topic lesson we then planted our own seeds to look after. We have planted mange tout and we are hoping that when we harvest them we will be able to eat them at snacktime.*

*In numeracy we have continued with our work on long and short and have also introduced longer and shorter to our vocabulary*

*In PE this week we learned a new game called 'The Bean game' and we had to move in different ways depending on which type of bean picture we were shown. We were very good at this game and have asked to play it in our next lesson too.*

*The children also continued with their gymnastics work and now they are beginning to remember how to perform different moves such as tuck jump, leap, bunny hop and Georges favourite the half turn jump. They used the visual card at their mat to support them and were then able to perform gymnastic jumps independently. They moved to different mats swapping with their friends. They worked collaboratively, watching each other and then demonstrating too. They even had time to pose for photographs.*
