

This week Class 5 has been planting seeds in pots that we decorated. We have looked at the seeds found in mangos, melons, plums and avocados. The children were also able to taste them. As well as the fruit we have planted some peas and pumpkins. We hope to plant them outside once they start growing.

The children have really enjoyed exploring the split peas and sand in the morning and bubbles outside.

We had a fantastic time playing with water this week. It would be really useful if we could have spare clothes - particularly socks! Thank you
